

FOR IMMEDIATE RELEASE

Get to Know Us

Edwin Morales | January 1, 2017

Manufacturing Solutions, Inc. has been dedicated to developing and creating custom machinery for your company's specific needs since 1989. Our customers come from all industries and areas of business; Fortune 100 businesses to small family-run operations. We build machines ranging from small fixtures, to intricate manufacturing lines, which is why customers often don't come to us just once. We value your loyalty and hard work and that is why we pride ourselves on our full transparency with our customers. Clients are invited to take advantage of our open-door policy that allows them to be intimately involved with their projects. Visits are always encouraged in our Frankfort, Illinois location. From timeline meetings, to milestone reviews, our goal is to keep you well informed and involved with the project. We want to hear your input in order to create a more personalized product that fits your unique needs.

Beginning with a concept, we bring your idea to life. Our machinery is custom built using state of the art technology and the highest quality components while maintaining cost effectiveness. We also take into account your existing technology and integrate it with our uniquely designed machines to create a seamless transitional process. We recognize the importance in modernity as technological and economic practices change. Using advanced proven technologies, we develop solutions that allow you to maintain your competitive

advantage against both foreign and domestic competition. We are continually studying and applying new technologies that make sound business sense depending on your industry. Every business we have helped has increased their profitability because of our prioritization of your business goals. Our goal has always been to help you be more profitable through the careful application of technology.

Our employees here at MSI consist of creative and innovative engineers and machine builders that have the knowledge and extensive project experience needed to create novel machines for you. Our staff includes specialists in the areas of design and development, electrical engineering and manufacturing disciplines all ready to assist you. We encourage unbounding creativity with our employees and their ingenuity is reflected in their long list of projects. With hundreds of successful applications in the field, our goal is to continue to supply superior machinery, equipment, and service in addition to maintaining long-term relationships with our customers. We are devoted to working diligently for you and to creating a friendly and professional rapport, no matter what size business you have. Let us help you with your next project.
